## Conference Video Production packages

### ***Making the Most of Your Investment***

A conference, product launch or company celebration can be expensive. For a little extra, we can video record your corporate event so that you can get full value from the occasion.

You may want those who missed out to watch and benefit from the speakers, use the footage to advertise future such events or simply as a valuable reminder of the good time had.

From a single camera operation to a multi-camera setup we can record your event in a professional and unobtrusive manner.

Packages start from as little as \$440 for a professional operator with a High Definition camera recording for up to 2 hours. For more information of our great value for money service give us a call.
